Starters Week

Day Thursday 06.02.2025 Getting Started. The Path to a Successful Doctorate

09:00 am **Welcome to the Workshop**

by Daniel Friedrich, Impulsplus

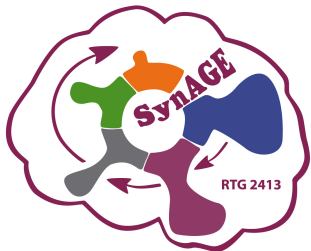

"Do I have a plan for my doctorate?
How do I set priorities and create a schedule?
What does the writing process require?"

The multi-year project of a doctorate raises many questions that require independent and appropriate solutions. The workshop helps to develop a strategy that is suitable for the individual so that one's own planning leads to the goal both effectively and efficiently. In addition to teaching self-management methods, the workshop also focuses on recognizing and exploring external resources such as dealing with external expectations and active support from supervisors.

12:15 pm **Lunch Break**
