

CBBS-GP Workshop

07.-08.10.2025

For October 7th and 8th, 2025, the CBBS Graduate Program has organized together with the RTG SynAGE a two-day workshop on

AI as support in research and scientific writing

The workshop will have a very interactive and practical program.
So, please bring your laptop!

The program will start on both days at 9 a.m. sharp and finish at 5 p.m.
We have booked room number 225 in building G 22A on the main campus.
There is a small coffee bar in the building, where we may drop by already before 9 – and, of course, during the day.
For an informal discussion we'll go for lunch to the café PIER 16 in the physics building organized by SynAGE.

And the scientific program?

After an introduction on AI you'll learn about different prompting techniques and AI tools with a focus on applications in research. On the second day, more in-depth specialized tools will be presented and image generation tools useful for e.g. graphical abstracts will be introduced.
